- SDS Strait-Flex - Joint Tape For Joint Tape

Installation

- Cut patch to desired dimensions.
- Prepare surface by cleaning and lightly sanding area around receptacle.
- Apply 1/4" of quick set or drywall compound directly to back of Roll Patch.
- Flip over patch and position Roll Patch over center of repair and wipe down flat to wall using joint knife.
- Immediately skim coat edges of patch and let dry. Compound that remains on back side of Roll Patch in damaged or mis-cut areas makes Roll Patch very rigid.
- Apply second coat. Let dry and sand. Roll Patch will not fuzz up during sanding.
